A new strongly built concrete underground telephone exchange has been constructed at the corner of ulica Chelminska and ulica Olszewska. It serves only the ministries, the general staff, and other important state organizations. It is not known whether this exchange is already in use or is intended only to be used in case of war. Underground telephone lines connect it with buildings already occupied by various ministries and also with new buildings, some still under construction, not yet occupied. It is known that, in particular, the buildings on Al. Szucha (the Ministry of War and others) and on ulica Koszykowa (the U.B. building) are connected to the new exchange.
